version 25 August 2006

Preface

The Liberia Forest Reassessment Project, funded by the European Commission, Brussels and the Critical Ecosystem Partnership Fund, Washington, is one of the first conservation efforts focussing on Liberia after the civil war 1990-1998. In Liberia there is still much tropical forest remaining, and its biodiversity value is high, related to the high rainfall it receives.

Wageningen University and more specifically its Herbarium Vadense has always paid much attention to Liberia. A lot of data, documents and collected plant material still reside there. This review report was intended to transfer the necessary to the partners of the new Liberia Project, to enhance its success.

Contents

1. Introduction	3
2. Review of former forest cover, vegetation and other maps of Liberia.....	4
2.1 Topographic and other base maps of Liberia	4
2.2 Digital topographic and other base map layers of Liberia	6
2.2.1 Digital Chart of the World (1993).....	6
2.2.2 Topographic layers digitised from the Green book (MPEA 1983).....	7
2.2.3 Other digital map layers	7
2.2.4 Relief & topography	8
2.2.5 Geology, lithology & soil.....	9
2.3 Forest cover mapping in Liberia through the 20th century	10
2.3.1 Literature references and former forest assessments in Liberia.....	10
2.3.2 Forest cover maps based on aerial photographs.....	11
2.3.3 Forest cover maps based on low resolution satellite images (NOAA-AVHRR or SPOT-Vegetation).....	14
2.3.4 Forest cover maps based on high resolution satellite images (Landsat-TM, SPOT or JERS radar)	18
2.4 Vegetation maps of Liberia	22
2.5 Recommendations	24
3. Development of a vegetation classification system.....	25
3.1 Review of the legends of former forest cover maps.....	25
3.2 Discussion	27
3.3 Recommended mapping units for the Forest Reassessment project	28
3.4 Image interpretation example for Sapo National Park	29
4. Plant biodiversity surveys in Liberia.....	33
4.1 Forest inventory data	33
4.2 Site/plot vegetation data from Liberia.....	36
4.3 Review of botanical collections in Liberia.....	37
4.4 Recommendations for field work during the Forest Reassessment Project.....	37
References	38
